

## Why our in-house Screening Mammography program is the superior choice!

- Comfortable and convenient in-office care
- Expert Breast Radiologist
- Cutting edge technology
- A new AI enhancement to aid in hard-to-find areas of concern

### Our Expert Radiologist: Gary M. Levine, MD

A nationally recognized, board certified, sub specialized breast radiologist with decades of experience in breast imaging and breast center leadership, Dr. Levine has received numerous honors and is frequently tapped by the news media as a medical expert in the field of breast cancer. In addition to viewing mammography images for SWCWC patients, he also serves as Medical Director of MemorialCare Breast Centers in Orange and Los Angeles counties and President of the National Consortium of Breast Centers.

### Convenience

Quick scheduling for Mammography and DEXA

Spa like experience

Experienced techs

Additional partnerships for continuing care for further diagnostics and/or treatment options

### Introducing the Transpara Enhancement Option

Artificial Intelligence, or AI, is bringing advancements to health care at a rapid pace. SWCWC is proud to be the Valley's FIRST in-office screening center to offer patients the option of using **Transpara from ScreenPoint Medical** which gives our expert Breast Radiologist a "second pair of eyes" during review of our screening mammogram.

By reviewing millions of images and continually advancing their comparative algorithm, this cutting edge technology significantly enhances the accuracy and reliability of your screening mammogram evaluation. The first FDA cleared AI solution, Transpara has been proven, in numerous clinical studies, to dramatically improve the early cancer detection rate which can translate into more effective and less invasive treatment options. Even Dr. Levine's extensive expertise can benefit from the leveraging of this deep machine learning. used in combination, the result is a "superhuman" evaluation of your screening mammogram.

For patient who wish to leverage this added benefit, a \$29.00 out of pocket cost will be due at the time examination (unfortunately, AI enhancement technology is not currently covered by insurance).

**WE LOOK FORWARD TO SERVING YOU IN OUR TEMPE LOCATION!**
